- International Recognition

What is Testing(測試)?

According to ISO/IEC 17000:2004 :

"Testing" - determination of one or more characteristics of an object of conformity assessment (e.g. heavy metals in toy), according to a specified technical procedure (e.g. ISO 8124).

- For checking compliance of the characteristics with acceptance criteria specified in standards, specifications or regulations.
- Testing can be conducted by first, second or third party.

Testing Services accredited by HKAS

- Calibration Services
- Chemical Testing
- Chinese Medicine
- Construction Materials
- Electrical and Electronic Products
- Environmental Testing
- Food
- Forensic Testing
- Medical Testing
- Miscellaneous
- Pharmaceutical Products
- Physical and Mechanical Testing
- Proficiency Testing Providers
- Reference Material Producers
- Testing Required by The China Compulsory Certification System
- Textiles and Garments
- Toys and Children Products

Construction Materials Testing

- Compressive strength test of concrete cubes
- Tensile strength test of reinforcing bars
- Door and door lock test

Pros and Cons for Product Testing

- Pros: direct evaluation to the conformity of product(s)
- Cons:
 - > results valid for the tested samples only
 - requires representative samples for making inference of the test results to a batch of products
 - usually not involved in the control of the manufacturing processes
 - sometimes, different results may be obtained by using different testing methods (can be avoided if standard methods are used)

What is Product Certification?

Product Certification

A third party certification body issues a certificate to confirm that a product of a given supplier satisfies the requirements of a specified certification scheme.

Certified products may bear a certification mark to demonstrate their quality, which can directly link to the conformity of the product with specified requirements.

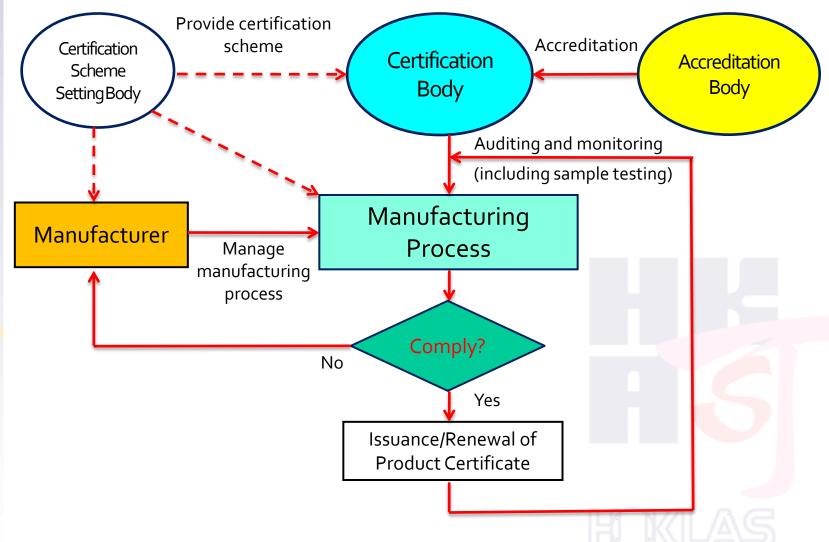

HOKLAS

Product CertificationAn Upstream Quality Control

Certification Services (Construction Products) Accredited by HKAS

Product	Certification scheme	Number of accredited certification bodies (as of 2016.09.06)
Concrete	QSPSC	3
Tile adhesive	PCCS-TA	4
Cement	PCCS-CP	2
Ceramic tile	PCCS-CT	2
Repair mortar	PCCS-RM	3
Standard sand for cement	QS/SSC	1
Standard sand for sand replacement test	QS/SSR	1
Passive Fire protection products	PCCS-PFPP	2
Aluminum window	PCCS-AW	2
Frictional hinge	PCCS-FH	1
Mesh reinforcement	PCCS-MR	1

Example: Quality Scheme for the Production & Supply of Concrete (QSPSC)

- System 5 product certification scheme developed by Hong Kong Quality Assurance Agency (HKQAA)
- Developed by representatives of concrete producers, contractors, government bodies, educational institutes and users
- Participants shall operate a quality manual with requirements according to ISO 9001
- Type tests shall be provided by HKAS accredited laboratories

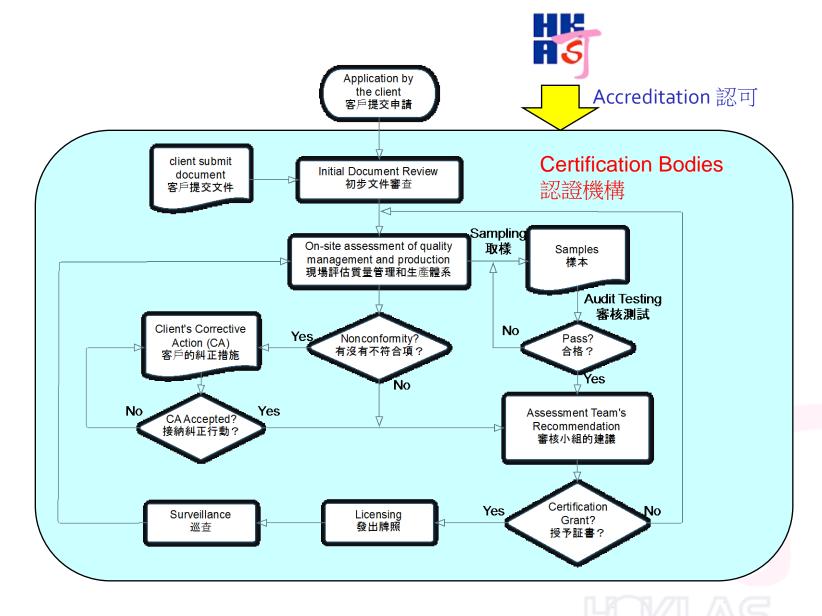

HOKLAS

Example Flow of QSPSC

Benefits of Product Certification

- Improve acceptance and confidence of customers
 - With independent 3rd party involvement to assure the products comply with the specified requirements
 - Requirements well defined
 - Products usually carry a certification mark
 - Better traceability of products
- Reduce risk of non-compliance / rework
 - Through rigorous process control and/or surveillance

Benefits of Product Certification

Reduce costs of monitoring

 Certification bodies help customers monitor the performance of manufacturers and products

Excessive resources not required

 Most manufacturers already obtained ISO 9001 system certification

Introduction to Hong Kong Accreditation Service (HKAS,香港認可處)

香港認可處 (HKAS)

 HKAS is part of Innovation and Technology Commission of the Hong Kong Special Administration Region (HKSAR) Government.

香港認可處是香港特別行政區政府創新科技署屬下工作組別

- # It was set up in 1998 (previously known as HOKLAS since 1985) 於1998年成立(前身是香港實驗所認可計劃HOKLAS執行機關,於1985年成立)
- ◆ It is the official accreditation body in Hong Kong 是香港官方認可機構
- # It provides independent and impartial accreditation services 提供獨立和公正的認可服務

 HKAS provides accreditation (認可) services to testing laboratories, certification bodies and inspection bodies under 3 schemes:

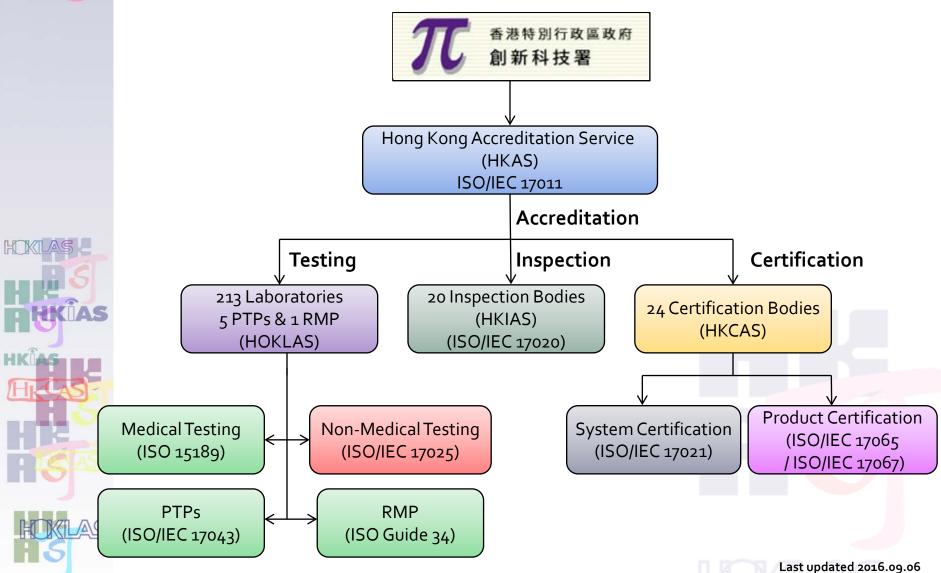

- HOKLAS (香港實驗所認可計劃)
- HKCAS (香港認證機構認可計劃)
- HKIAS (香港檢驗機構認可計劃)
- Participation in the 3 schemes is voluntary
- The schemes are operated in accordance with international standards

Schematic Diagram of Accreditation

What is Accreditation (認可)?

According to ISO/IEC 17000:2004 Conformity assessment – Vocabulary and general principles:

"Accreditation" – Third party (i.e. accreditation body) attestation related to a conformity assessment body (i.e. laboratory, inspection body or certification body) conveying formal demonstration of its competence to carry out specific conformity assessment tasks (i.e. testing, certification and inspection)

Accreditation Body - Provides assurance

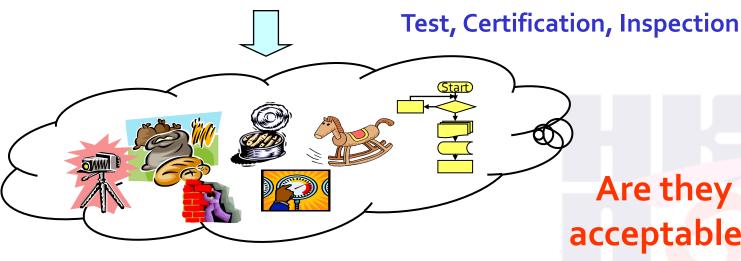

Accreditation can help you!

Are they acceptable?

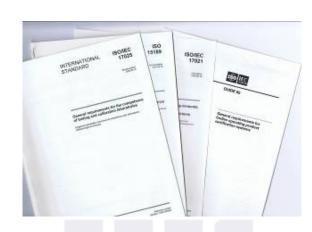

Features of HKAS Accreditation

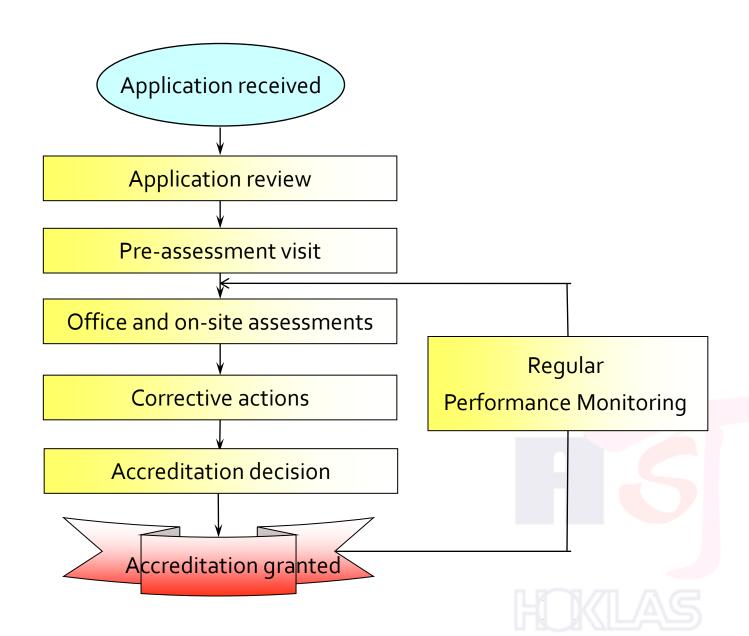

- A service provided by Government through ITC
- Participation is voluntary
- Based on international standards
- Rigorous assessment and monitoring
- International recognition through mutual recognition arrangements
- Independent and impartial
- Tailored for local conditions

Accreditation Process Flow Chart

Monitoring of Accredited Organisations

- Through rigorous reassessments and other monitoring measures
 - Reassessments (複評審)
 - Surveillance (監察)
 - Monitoring of changes
 - Complaints handling (處理投訴)
 - Proficiency Testing (能力驗證) / Inter-laboratory Comparison Study
 - ➤ Code of conduct (紀律守則)

International Recognition

International Recognition

- HKAS is a signatory to the Mutual Recognition Arrangement (MRA) of International Laboratory Accreditation Cooperation (ILAC, www.ilac.org), and Multilateral Recognition Arrangement (MLA) of International Accreditation Forum (IAF, www.iaf.nu)
- Accreditation status of specific scope recognised by over 91 accreditation bodies in 85 economies in the world
- HKAS is well recognised by region/international accreditation community

Endorsed Reports and Accredited Certificates under HKAS Accreditation Schemes 印有香港認可處認可計劃標誌的報告及認證證書

 Unless otherwise approved and specified, only results of accredited activities can be shown in endorsed reports and accredited certificates

除非經批准及清楚註明,否則獲認可機構只可就獲得認可資格的活動所得結果發出載香港認可處認可計劃標誌的報告及證証證書。

 Since the competence of the accredited activities has been assessed, the reliability of results in endorsed reports and certificates can be assured

由於獲認可機構在獲得認可資格的活動上其能力曾經接受嚴謹的評審,載香港認可處認可計劃標誌的報告及證証證書上的結果會更可靠。

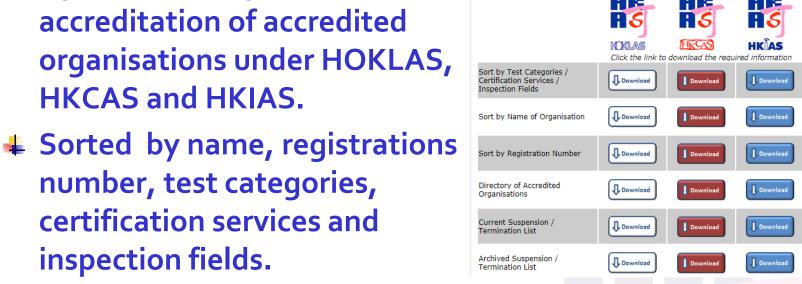

Accredited Organisations

(http://www.hkas.gov.hk)

- Up-to-date scope of accreditation of accredited **HKCAS** and **HKIAS**.
- number, test categories, certification services and inspection fields.
- Lists of accredited organisations currently under voluntary/imposed suspensions and terminations
